WORK EXPERIENCE

KiaKia Finance

London, Remote

Software Engineer

Sep 2023 - Present

- Building modern software solutions for the currency exchange industry, making transacting with different currencies seamless and accessible to over 30,000 customers.
- Optimized API interactions, leading to a 15% reduction in latency and enhancing overall platform responsiveness.
- Integrated with a RESTful backend API to develop core business features such as marketplace enabling currency pair trading, currency conversion, fund transfers, and invoicing. This integration led to a 30% increase in business revenue and expanded accessibility for customers in the currency exchange industry.
- Leveraged tools like React, NextJS, TypeScript, Jotai, and Tanstack React Query to enhance user experience, resulting in a 25% increase in transaction completion rates.
- Utilized React Hook Form with Zod to reduce form submission errors by 30%, ensuring accurate data input for over 30,000 customers transacting with different currencies.
- Translated Figma design screens into high-performance UI interfaces, achieving a 20% improvement in page load times and ensuring compliance with web accessibility standards.

Plethub

Lagos, Nigeria
